Whitehill Primary School – Toilet Block Refurbishment

-

Transforming school washroom facilities through a comprehensive refurbishment programme.

We successfully secured the contract to refurbish four toilet blocks at Whitehill Primary School. The project formed part of the school's two-year refurbishment programme, with half of its toilet blocks scheduled for improvement each year. We worked closely with the school to deliver the first phase during the summer holidays. This allowed us to complete the work while pupils and staff were away, minimising disruption to the school day.

The Project

Our team completely stripped out all four toilet blocks. We then installed new toilets, cubicles, wash troughs, flooring and lighting. The refurbishment gave each facility a fresh, modern look while improving its practicality for everyday use.

In addition, we fitted rear panelling to conceal unsightly pipework. This created a much neater finish and gave the washrooms a clean, streamlined appearance. Alongside the toilet refurbishment, we reconfigured an existing area containing two sinks. We transformed this space into a much-needed storage area, making better use of the school's available space.

We completed all works during the summer holidays, ready for the pupils' return at the start of the new school year. All of the toilets now have a light and clean feel.

A successful first phase, with more to come

The school has been extremely pleased with the results and the transformation of its facilities. Following the success of the project, Whitehill Primary School has asked us to provide a quotation for refurbishing the remaining toilet blocks next summer.

We are delighted to have the opportunity to continue working with the school.

This project demonstrates our ability to deliver high-quality school refurbishments, work to tight summer holiday programmes and create practical, modern facilities that make a real difference to the school environment.
