Fairford Academy – Specialist Resource Provision & Nursery Refurbishmenturce Provision at Fairford Academy

Project Overview

Following the school's successful award of an FDA grant, we were appointed to deliver the new Specialist Resource Facility, transforming existing accommodation into a purpose-designed, more accessible and specialist learning environment.

The project involved the refurbishment and adaptation of several existing areas to better support pupils with additional needs, creating practical, welcoming and functional spaces tailored to the requirements of both students and staff.

Scope of Works

The **Specialist Resource Provision** refurbishment included:

- Refurbishment of two classrooms to create enhanced specialist learning environments.
- Conversion of a dedicated one-to-one teaching room.
- Installation and refurbishment of a kitchenette.
- Refurbishment of staff and student toilet facilities.

Alongside the specialist provision, the project also incorporated an extensive nursery refurbishment, designed to provide facilities appropriate for younger children and their individual care requirements.

The **Nursery** works included:

- A refurbished changing room with dedicated washing facilities.
- A purpose-designed baby-changing area.
- Refurbishment of three student washrooms, incorporating specialist facilities suitable for nursery-aged children.
- Refurbishment of a DDA-compliant accessible toilet.
- Refurbishment of three additional classrooms.
- Creation of a dedicated sleep room.
- Kitchen refurbishment, including the installation of a serving hatch.

Project Outcome

The completed works have helped Fairford Academy enhance its learning and care facilities, providing improved accommodation for pupils across different age groups and with a range of individual needs.

By adapting and upgrading existing spaces, we have helped the school maximise its current

facilities while creating more functional, accessible and fit-for-purpose environments for teaching, learning and care.

The project demonstrates our ability to deliver considered refurbishment solutions within the education sector, combining practical construction expertise with an understanding of the specialist requirements of modern educational environments.
