Single Storey Side Extension

Single storey side extension. This project was to enhance the ability of a young family to provide care for a young disabled person. This involved providing a special needs bathroom and bedroom specifically for him. The bathroom included the installation of a height adjustable Kingkraft Multibath, and electronic rise and fall Balena toilet suite. An electronic rise and fall basin and electronic ceiling track hoist system was also installed. The formation of the ground floor bedroom within the extension improved the young person's quality of life. Along with the other internal alterations we carried out, this ensured the family as a whole had a property more suitable to their needs

We also formed a large patio area to the rear of the property. This improved the access for the young person. It enabled him to appreciate the large rear garden. Existing parking bay alterations were also made to improve access to the front of the new extension.

Waller Building Services

Established in 1993, Waller Building Services has been growing ever since. We regularly work in the residential and commercial sectors.
